MMIANEW TERMINAL beckons

WHAT THIS MEANS

- It has a capacity to process a minimum of two million passengers annually.
- Its billed to achieve HUB status for Nigeria in the West African Sub –region.
- The New Terminal will alter the ambience of the airport as new link roads have been constructed to create a drive and drop off arrangement for motorist plying the airport.
- The old Terminal would still be put to use because of constraints of size of the new facility.
- The New Terminal with strategically designed TRANSIT facilities will ease the stress of passengers and other users of the facility.
- The New Terminal is expected to have the latest Technology that is critical for check in counters, fibre optic technology to take care of all communication needs.
- Passengers comfort option in terms of air conditioning system, charging ports attached to seat at the terminal etc.
